

I am in support of Strong Net Neutrality backed by Title II oversight of ISPs. I am in very, very clear opposition to Docket 17-108.

Keeping the Net open and unmetered is vital to its survival. The internet is as vital to life in today's world as the telephone was a generation ago. It is a utility and should be regulated as such. If a company wants to provide paid for content that is their business model and should not impact the flow of the internet as a whole.
